PROFESSIONAL SUMMARY

Software developer with 2+ years of experience building full-stack web applications through freelance projects, internships, and commissioned systems. Skilled in PHP, Laravel, JavaScript, React, HTML, CSS, REST API integration, MySQL, PostgreSQL, Git, and responsive web development, with experience delivering user-focused applications and integrating third-party services.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, PHP, SQL, Python | **Frontend:** HTML5, CSS3, React, Next.js, React Native, Tailwind CSS, Bootstrap, ShadCN/UI, Vite | **Backend:** Laravel, PostgreSQL, MySQL, Prisma ORM, Firebase, Supabase, CodeIgniter, Zod | **Tools & Design:** Git, GitHub, Bitbucket, Docker, Jira, ClickUp, Figma, Adobe Photoshop, Cursor, Claude Code, WordPress, Elementor | **Other:** REST APIs, Responsive UI/UX Design, Base44, Basic Linux CLI

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer | Self-Employed | June 2024 – Present

- Designed and developed custom web and mobile applications using React, Next.js, TypeScript, PostgreSQL, REST APIs, and modern AI-assisted development workflows.
- Delivered end-to-end solutions from requirements gathering and UI/UX implementation to deployment and maintenance, while also building AI-assisted websites to deliver responsive and user-focused client solutions.

Software Developer Intern | NLP Business Development Services | November 2025 – February 2026

- Developed and maintained full-stack business applications using Laravel, PHP/CodeIgniter, React, Next.js, PostgreSQL, and Prisma ORM.
- Redesigned internal modules to improve UI/UX and collaborated through Bitbucket workflows with AI-assisted tooling to accelerate debugging and feature delivery.

Intern Developer | J Labs Innovatech Inc. | March 2026 – April 2026

- Contributed to cross-platform mobile application development using React Native, Expo, and TypeScript within an Agile development environment.
- Integrated third-party AI APIs and implemented Zod-based validation for onboarding, profile management, and data integrity.

Intern Developer | OneNetworkx Marketing | May 2026 – June 2026

- Developed responsive insurance platforms and interactive product systems using React, Vite, and Tailwind CSS.
- Migrated email infrastructure to the Gmail REST API via OAuth2 and integrated PostgreSQL/Supabase to optimize secure lead management and asynchronous data workflows.

SELECTED PROJECTS & COMMISSIONS

- **Solace Point** | Full-Stack Developer | June 2026 — Developed a full-stack digital insurance platform for OneNetworkx Marketing, streamlining customer onboarding and non-life insurance sales workflows.
- **Property Custodian Management System** | Full-Stack Developer | Feb 2026 — Built a Microsoft Power Platform asset management system with predictive inventory forecasting and lifecycle tracking for a commissioned client.
- **AlertPoint: Disaster Risk Reduction System** | Lead Full-Stack & IoT Developer | Oct 2025 — Developed an award-winning IoT disaster response platform integrating sensor networks, web dashboards, and mobile emergency broadcasting. (Best in IoT-Cross Platform Award)
- **VetFlow: POS & Inventory System** | Lead Full-Stack Developer | Feb 2025 — Developed a Laravel/PHP and MySQL point-of-sale and inventory management system that digitized operations for a veterinary clinic.

EDUCATION

Bachelor of Science in Information Technology – Mobile and Internet Technologies (Summa Cum Laude)

National University — Fairview | June 2022 – August 2026

- **Awards:** Consistent Blue Scholar (100% Scholarship), Consistent First Honor Dean's Lister, Former Google Developer Student Clubs Chief Creative Officer, UI/UX & Networking Competition Champion
