

BRYANT IVERSON C. MELLIZA

SOFTWARE DEVELOPER

Caloocan City, Metro Manila, Philippines | bryantiversonmelliza03@gmail.com |
+639398170375 | Portfolio: [bryant-melliza.vercel.app](#)

4th-year IT student and Software Developer Intern focused on building scalable web and mobile applications. Proficient in React, Next.js, React Native (Expo), and PostgreSQL, with a solid foundation in PHP/CodeIgniter. Experienced in leveraging ClickUp and AI-assisted development tools to optimize workflows and accelerate the delivery of premium, real-world software solutions.

EDUCATION

Bachelor of Science in Information Technology with Specialization in Mobile and Internet Technologies

June 2022 - August 2026

National University — Fairview

- **Awards:** Consistent First Honor, Blue Scholar (100% Full Merit Scholarship)
- **Leadership:** Chief Creative Officer, Google Developer Student Clubs (2024)
- **Competitions:**
 - Sole Awardee, Best Web Game Design – XOXO (March 2024)
 - Champion, UI/UX Design Competition (Dec 2024) | Champion, Networking Competition (Dec 2024)
 - Awardee, Exemplary Performance in Internal Pursuit (July 2025)

Science, Technology, Engineering, and Mathematics (STEM) Senior High School

August 2020 - July 2022

Caloocan National Science and Technology High School

TECHNICAL SKILLS

- **Frontend Development:** React 19, Next.js, Tailwind CSS, HTML5/CSS3, React Native, Expo Router, Zustand (State Management)
- **Backend & Database:** PHP (CodeIgniter), PostgreSQL, Prisma ORM, MySQL, Firebase, Supabase
- **Tools & DevOps:** GitHub, Bitbucket, Jira, Microsoft Power Platform, ClickUp
- **UI/UX & Design:** Figma, Canva, User Research, Wireframing, Stitch
- **Specialized & Hardware:** IoT Integration (Arduino, Raspberry Pi), Rule-Based AI Logic

PROFESSIONAL EXPERIENCE

Software Developer Intern | NLP Business Development Services

November 2025 - February 2026

- **Full-Stack Development:** Engineered responsive web applications using React 19, Next.js, and Prisma (PostgreSQL), while maintaining legacy CodeIgniter (PHP) systems to ensure continuous service availability.
- **UI/UX Modernization:** Led the rapid redesign of internal modules, delivering two distinct visual iterations that improved user navigation flow and interface responsiveness.
- **Database & Workflow:** Optimized data schemas using Prisma ORM and streamlined collaborative development cycles through Bitbucket version control.
- **Development Efficiency:** Accelerated feature delivery and maintained code quality standards by integrating AI-assisted tooling into the development workflow, significantly reducing debugging time.

Intern Developer | J Labs Innovatech Inc.

March 2026 - April 2026

- **Full-Stack Mobile Development:** Contributing to the development of cross-platform (iOS and Android) applications using React Native and Expo, specifically integrating third-party AI APIs to enhance user interaction features.
- **Agile Lifecycle Management:** Collaborating within a structured Agile environment by resolving technical tickets managed through ClickUp, coordinating closely with PMs for task priority and QAs for bug verification.
- **Code Optimization & Validation:** Enhancing application performance through the refactoring of TypeScript service layers and implementing strict data validation using Zod to ensure seamless user onboarding and profile management.
- **UI/UX Implementation:** Developing responsive interfaces and optimizing user experience by managing hardware permissions and implementing complex filtering logic for user discovery preferences.
- **Technical Maintenance:** Executing rigorous debugging and conflict resolution within Git-based workflows to stabilize features and ensure high-quality builds for both development and staging environments.

- **Full-Stack Web Architecture:** Architecting end-to-end digital platforms from scratch using Vite, React, and Tailwind CSS, building scalable layouts designed for company deployment and marketing.
- **UI/UX & Identity Design:** Conceptualizing full brand systems, interactive wireframes, and premium layout designs to translate core insurance products into high-end user experiences.
- **Front-End Engineering:** Developing high-performance user interfaces with dynamic, scroll-responsive navigation systems, infinite carousels, and GPU-accelerated reveal animations.
- **Form Optimization & Validation:** Building data-capture screens for quotes and advisor inquiries, enforcing strict client-side validation rules to maintain data integrity.
- **Domain Feature Integration:** Transforming complex non-life insurance categories (Property, Transport, Bonds) into modular product grids and interactive info modals to boost user conversion.

KEY PROJECTS & COMMISSIONS

- **Property Custodian Management System** | Full-Stack Developer (Commission, February 2026)
 - **Predictive Logistics:** Developed a resource management system using **Microsoft Power Platform**, featuring predictive algorithms for item replacement and inventory calculation.
 - **Impact:** Streamlined asset tracking for the client, reducing manual audit time and improving equipment lifecycle visibility.
- **Prefect Disciplinary Action System** | Full-Stack Developer (Commission, February 2026)
 - **Decision Support Logic:** Engineered a rule-based database architecture that acts as an automated decision support engine, categorizing student infractions and recommending handbook-compliant actions.
- **PetSense: RFID Grooming Management** | Web & IoT Developer (Commission, October 2025)
 - **Hardware Integration:** Developed a web-based tracking system integrating RFID technology to automate pet identification and streamline grooming service logs.
- **Safety Heroes (Caffeine.AI Hackathon)** | UI/UX & AI Developer (October 2025)
 - **Rapid Prototyping:** Designed and developed an AI-driven educational platform for disaster preparedness within a 3-hour timeframe.
- **AlertPoint: Disaster Risk Reduction System** | Lead Full-Stack & IoT Developer (October 2025)
 - **IoT Integration:** Built a real-time disaster response network for Barangay 170, integrating hardware sensors with a web dashboard and a mobile app to broadcast emergency alerts.
 - **Recognition:** Best in IoT-Cross Platform Award (October 2025)
- **VetFlow: POS & Inventory System** | Lead Full-Stack Developer (February 2025)
 - **Market-Ready Solution:** Engineered a custom Point-of-Sale and inventory architecture for Shepherd Animal Clinic using PHP and MySQL, replacing manual workflows with an automated solution.
- **SALBAG: Smart Anti-Theft IoT Device** | Project Manager & IoT Developer (June 2024)
 - **Hardware Intelligence:** Engineered a Raspberry Pi 4B system featuring real-time Face Detection (Computer Vision), GPS tracking, and automated panic alarms for theft prevention.
